

Victor Augusto Tramontina

COMPUTER ENGINEERING – **FULL STACK DEVELOPER**

📞 +55 (54) 9 9937-7877 | ✉️ victor.tramontina@universo.univates.br | 🌐 <https://github.com/VicTramontina>

About Me

Motivated and collaborative full stack developer with strong problem-solving skills and a solid background in **backend (Vanilla PHP, SQL)** and **modern frontend (ReactJS, TailwindCSS, Styled Components)**. Experienced in maintaining legacy systems, refactoring architectures, and integrating **cloud services (AWS)** and third-party APIs (OAuth2). Frequently leverages **AI tools and assistants** to support coding, debugging, and technical decision-making. Enthusiastic about learning and sharing knowledge, with an active role in **team discussions and technology decisions**.

Skills

Frontend	ReactJS, TailwindCSS, Styled Components, React Hook Form, Zod
Backend	Vanilla PHP, Node, SQL, REST APIs, OAuth2
DevOps & Tools	Docker, Git, AWS (EC2, S3, Lambda, Cognito, Amplify), Linux, Crontabs
Mobile	React Native, Java, Android Studio, SQLite
Integration	Payment gateways, ERP platforms, Notifications and e-mail systems

Professional Experience

Macro Publicidade – Conecta Venda System

Brazil

Full Stack Developer

2022 – Present

- Worked in a **small agile team** (5 members) using **Scrum methodology**.
- Maintained **legacy PHP systems** and refactored old AngularJS frontends into **ReactJS**.
- Helped architect and implement **system-wide improvements** in frontend and database models.
- Developed **reusable frontend components** and backend utilities to streamline workflows.
- Participated in **technical decision-making**, mentoring junior teammates, and improving team practices.
- Integrated external services using **OAuth2**, including payment gateways and ERP systems.
- Handled **deployments and environment management** using Docker and AWS.
- Contributed to the digital transformation of the company's systems, improving maintainability and scalability.

Personal Projects

Android Ticketing System

2023

Guaporé - RS

- Developed a **complete Android app** for ticket printing and bar sales management.
- Implemented product registration, order creation and report exports.
- System is used by **over 8 companies** in the city.
- Technologies used: **Java, Android Studio, SQLite, Epson SDK**.

Education

Univates

Brazil

Computer Engineering

2022 – Present, **7th Semester**
